

Abstracts Not Presented

Every year, there are abstracts that could not be presented at our annual meeting for a variety of reasons. The fact that the abstracts were printed in the March 2016 issue of *Aerospace Medicine and Human Performance* does not mean that they were presented, only that they were accepted for presentation. It is important to remember that if an abstract was not presented, it should not be referenced. A total of 26 abstracts out of a possible 491 (one abstract was withdrawn prior to printing and one was withdrawn after the fact) were not presented (5.3%). The following abstracts were not presented at AsMA's 87th Annual Scientific Meeting, in Atlantic City, NJ, April 24-28, 2016:
