

## A

- Abstracts, 91st Annual Meeting—125
- Accidents, aviation
- acceptance of ballistic Chute usage—86
  - drug use reported by U.S. pilots—86
  - fatigue-related mishaps in USAF—440
  - G-LOC due to push-pull effect in F-16 mishap—51
  - helicopter underwater escape training—962
  - in high-performance general aviation aircraft—387
  - spatial disorientation in transport airplanes—65
- Acute mountain sickness, at the South Pole—46
- Acute pulmonary edema, in healthy subjects—662
- Adaptation, to airsickness after scopolamine treatment—313
- Adaptive tasks, with drones to measure impact of stress—376
- Aerial ports, musculoskeletal injuries and automation at—669
- Aerobatic flight
- G-LOC due to push-pull effect in F-16 mishap—51
  - vestibular function and motion sickness in—326
- Aeromedical disposition
- atrial fibrillation and recurrent stroke risk—352
  - CT coronary angiography screening—812
  - flowchart for systemic lupus erythematosus—826
  - hyperparathyroidism in Air Force loadmaster—59
  - migraine in military pilot applicants—37
  - olfactory meningioma in commercial pilot—966
  - presbycusis in pilots—403
  - Raynaud's phenomenon/hand-arm vibration syndrome—459
  - rhabdomyolysis—901
  - selective serotonin reuptake inhibitor use by aviators—897
  - spontaneous pneumothorax in pilot—116
  - spontaneous vitreous hemorrhage in naval aviator—904
  - total ankle replacement in military jet pilot—597
  - tularemia in an aviator—379
- Aeromedical transport
- as niche for aerospace medicine—311
  - transport times with helicopter VFR and IFR vs. ground—98
- Aerospace Medical Association (AsMA)
- 91st Annual Scientific Meeting Program and Abstracts—121
  - bylaws of—301
  - Fellowships in—63
  - mid-term report—837
  - News—466, 752
  - past presidents—295
  - President's Page—2, 63, 121, 385, 469, 541, 619, 687, 765, 837, 909
- Aerospace medicine
- aeromedical transport as niche for—311
  - creating a medical student curriculum in—448
- Aerospace Medicine and Human Performance*
- Foundation, donations to—2
  - new challenges—1
  - open access option—1
  - readership survey results on bi-monthly publication—608
- Affective cognition, human performance in long-term space missions—532
- Age effects
- motion sickness in Chinese college students—71
  - on NASA's Cognition Test Battery—18, E1(Jan)
- Air combat maneuvering, cervical EMG in—26
- Air traffic controllers
- hs-CRP impact on cardiovascular risk in—886
  - systemic lupus erythematosus case in—826
- Air travel—*See* Travel, air *and* Commercial airline passengers
- Aircraft carriers, modafinil and pilot landing performance—518
- Aircraft maintenance workers, exposure to organophosphate esters—710
- Aircraft—*See also specific types*
- acceptance of ballistic Chute system—86
  - accidents in high-performance general aviation—387
  - over-pressurization episodes in E-2D Hawkeye aircrew—970
  - seat ergonomics and passenger comfort—416
  - tactical, vigilance aid for carrier landings—518
- Aircrew—*See also* Commercial airline crew *and* Military aircrew
- large-scale EU study of fatigue in—628
- Airframe parachute
- social acceptance of Chute usage—86
- Airlines—*See* Commercial airlines
- Airplane headache—373
- Airport terminals
- impact of human microbiome on—651
  - improving infection control measures at—611
  - predeparture screening for coronavirus—909
- Airsickness, scopolamine treatment and adaptation to—313
- Alertness, caffeine and energy drink use by military aviators—641
- Altitude effects
- acute pulmonary edema in healthy subjects—662
  - decompression sickness risk markers—11, 455 (Letter)
  - high-altitude decompression sickness therapy—106
  - measuring transient cognitive impairments during acute hypoxia—839
  - psychophysiological response of pilots—785
  - respiratory muscle training impact on cycling at altitude—776
  - serious illness at South Pole—46
  - voice reactivity in acute hypobaric hypoxia—471
- Ambient pressure, in acute pulmonary edema in healthy subjects—662
- Ankle injuries, total ankle replacement in military jet pilot—597
- Antarctica, serious altitude illness cases in—46
- Anthropometric analysis
- cross-cultural, in military aviation—358
  - in screening for cockpit compatibility—725
- Antihistamines, drug use reported by U.S. pilots—388
- Antioxidant capacity, survival training effects on—720
- Apps
- Expedition App for Peak Psychological Performance—876, E2(Nov)
  - medication dose tracker app for astronauts—41
- Artificial intelligence
- robots to provide care for coronavirus patients—611
  - role in space healthcare—537
- Astronauts—*See also* Spaceflight
- autonomous psychological support for isolation—876, E2(Nov)
  - bioprinting and biofabrication to support health of—457
  - cognition test and spacecraft docking performance—861, E1(Nov)
  - dynamic posturography after long-duration spaceflight—621
  - female, potential venous thromboembolism risk in—432
  - medical risk quantification tool for—41
  - medication dose tracker app for—41
  - microgravity and muscle function after missions—422
  - ocular "glymphatic" system in optic disc edema—975
- Atrial fibrillation, stroke risk in pilots with—352
- Attention, in simulated flight with varying cognitive loads—489
- Audiometry, changes under hypobaric hypoxia—32
- Automation, at aerial ports, musculoskeletal injuries and—669
- Autonomic dysfunction, vitamin B12 deficiency related in military pilot—746

Autopilot mode, pilots' visual scanning behaviors during landing—511

Aviation, civil—*See* Civil aviation

Aviation, general—*See* General aviation

Aviators—*See* Aircrew and Pilots

Avionics, accident rates in general aviation—387

## B

Back pain, low, in commercial airline pilots—940

Ballistic Chute system, acceptance of usage—86

Behavioral intervention, for fatigue management, effects on flight attendants—911

Biocontainment units, on commercial aircraft—611

Biofabrication, in support of aerospace missions—457

Biomarkers, of fatigue during survival training—720

Bioprinting, in support of aerospace missions—457

Bithermal caloric tests, for seasickness—852

Body composition, differences in military pilots and aircrew—565

Bone loss, urinary calcium measures for tracking in space—689

Bone mineral density, in women, considerations for long-duration spaceflight—543

Boyle's Law, spontaneous pneumothorax in a fighter pilot—116

Brain tumors, olfactory meningioma in commercial pilot—966

## C

Cabin, aircraft

decompression sickness treatment using pressure suit—571

impact of human microbiome on—651

pressurization and non-arteritic anterior ischemic optic neuropathy—715

Caffeine, consumption by U.S. Army personnel—641

Calcitonin gene-related peptide (CGRP), monoclonal antibody injections for migraine prophylaxis—824

Calcium, urinary, for tracking bone loss and kidney stone risk in space—689

Carbon dioxide, inspired CO<sub>2</sub> exposure levels in extravehicular mobility unit—923, E2(Dec)

Cardiac arrest, supplemental O<sub>2</sub> for rescuers doing CPR in commercial aircraft cabin—918, E1(Dec)

Cardiac drugs, use reported by U.S. pilots—388

Cardiac output, in acute pulmonary edema in healthy subjects—662

Cardiac transplantation, selective recertification of pilots after—732

Cardiology

recertification of pilots after cardiac transplantation—732

screening with CT coronary angiography—812

stroke risk in pilots with atrial fibrillation—352

wearable ECG electrode model for long-duration spaceflight—868

Cardiopulmonary resuscitation, supplemental O<sub>2</sub> for rescuers in commercial aircraft cabin—918, E1(Dec)

Cardiovascular risk factors, impact of hs-CRP level in pilots and air traffic controllers—886

Cardiovascular system

responses after long-duration spaceflight—621

screening with CT coronary angiography—812

Career development, creating aerospace medicine curriculum—448

Carpal tunnel syndrome, with Raynaud's phenomenon and hand-arm vibration syndrome—459

Case reports

aircrew symptoms from over-pressure episode—970

airplane headache during flight—373

altitude illness at South Pole—46

disposition flowchart for systemic lupus erythematosus—826

facial nerve palsy during airplane travel—679

G-LOC from push-pull effect—51

high-altitude decompression sickness therapy—106

hypoxic skydiving—110

intraocular lead foreign body injury after ejection—674

migraine prophylaxis in commercial pilot—824

olfactory meningioma in commercial pilot—966

post-spaceflight rash and skin sensitivity—604

rehabilitation of chronic flight-related neck pain—369

rhabdomyolysis in civil aviation pilot—901

total ankle replacement in military jet pilot—597

vitamin B12 deficiency related syncope—746

Cataracts, from atmospheric nuclear tests—56

Cephalic fluid shifts, thigh cuff effects on in dry immersion—697

Cervical kinematics, for neck pain in pilots—790

Chest compressions, supplemental O<sub>2</sub> for rescuers in commercial aircraft cabin—918, E1(Dec)

Chimpanzees, in Project Mercury—462

Cholinesterase inhibition, exposure in aircraft maintenance workers—710

Circadian misalignment, PVT agreement between devices—409

Circadian typology, aircrew fatigue perceptions and mitigation strategies—363

Cirrus Aircraft, advanced avionics impact on accident rates—387

Civil Aerospace Medical Institute—541

Civil aviation pilots—*See also* Pilots

emotional conflict control in—798

rhabdomyolysis in—901

CNS tumors, olfactory meningioma in commercial pilot—966

Cockpit ergonomics, cervical EMG in air combat maneuvering—26

Cockpit fit, aviator anthropometric screening for cockpit compatibility—725

Cognition Test Battery, reliability of—18, E1(Jan)

Cognitive impairment

during acute normobaric hypoxia vs. hypobaric hypoxia—845

measuring transient impairments during acute hypoxia—839

olfactory meningioma in commercial pilot—966

over-pressurization episodes in E-2D Hawkeye aircrew—970

Cognitive load, effect on pilots' visual search strategies—489

Cognitive performance

affective cognition approach in space—532

relationship with the microbiome—651

Cold-water immersion

helicopter transport suit for—578

skin cooling and breath-hold duration during—578

College students, motion sickness predictors in Chinese—71

Color vision, shifts with hypoxia—394

Commercial airline aircrew

fatigue management intervention for flight attendants—911

large-scale EU study of fatigue in—628

measures to prevent infectious disease in—416

Commercial airline passengers

comfort of seats during long flights—416

ground-based care for in-flight medical emergencies—348

measures to prevent infectious disease in—416

risk of non-arteritic anterior ischemic optic neuropathy—713

Commercial airline pilots

awareness of flight-associated venous thromboembolism—343

in-flight UV-A exposure—501

large-scale EU study of fatigue in—628

low back pain in—940

migraine prophylaxis in—824

olfactory meningioma in—966

Commercial airlines, predeparture screening for coronavirus—909

Commuter flights, spatial disorientation in transport airplanes—65

Compartment syndrome—461

Conner's Continuous Performance test—839

Contraceptives

gynecologic risk mitigation for long-duration spaceflight—543

oral, venous thromboembolism risk in female astronauts—432

Coriolis illusion, impact on precise approach in simulated flight—767

Coronary artery disease, screening with CT coronary angiography—812  
 Coronavirus pandemic  
   aeromedical research and—765  
   impact on aviation and aerospace industries—469  
   improving airline passenger and personnel safety—611  
   pre-departure screening for—909  
 Corticosteroids, systemic, for upper respiratory tract infections in aviators—453  
 Cosmonauts—*See also* Astronauts  
   microgravity and muscle function after missions—422  
 Crashes—*See* Accidents, aviation  
 Crashworthiness, reducing accidents in general aviation—387  
 Creatine kinase activity, survival training effects on—720  
 Critical care transport, ground vs. helicopter VFR and IFR times—98  
 CT coronary angiography, coronary artery disease screening with—812  
 Culture, cross-cultural anthropometrics in military aircrew—358  
 Curriculum, for aerospace medicine—448

## D

Data collection, medication dose tracker app for spaceflight—41  
 Decompression sickness  
   recompression therapy for high altitude—106  
   treatment after loss of spacecraft atmosphere—571  
   venous gas emboli as risk marker—11, 455 (Letter)  
 Depression, autonomous psychological support for isolation—876, E2(Nov)  
 Dermatology, post-spaceflight rash and skin sensitivity—604  
 Dinitrogen tetroxide (N<sub>2</sub>O<sub>4</sub>), propellant off-gassing and emergency egress during space launch—956  
 Diphenhydramine, use reported by U.S. pilots—388  
 Disinfectant wheels, to combat viruses—611  
 Diving accidents, helicopter evacuations in immersion pulmonary edema—806  
 Docking, spacecraft, cognition test performance and—861, E1(Nov)  
 Drones, and adaptive tasks to measure impact of stress—376  
 Drowning, skin cooling effect on breath-hold duration—578  
 Drugs—*See* Medications and individual drug names  
 Dry immersion, thigh cuff effects on venous flow—697  
 Duty Not Including Flying (DNIF) time, systemic corticosteroids for aviators with URTIs—453  
 Dynamic posturography, responses after long-duration spaceflight—621  
 Dynamic stabilization task, using machine learning—479, E1(June)

## E

E-2D Hawkeye aircraft, over-pressurization episodes in aircrew—970  
 Earplugs, custom, faster delivery to troops—749  
 Education, creating an aerospace medicine curriculum—448  
 Egress, emergency  
   helicopter emergency breathing apparatus—962  
   during space launch, propellant off-gassing implications—956  
 Ejection injuries, intraocular lead foreign body—674  
 Electrocardiography (ECG), wearable electrode placement—866  
 Electromyography (EMG), cervical, in air combat maneuvering—26  
 Emergencies, in-flight  
   ground-based medical services for—348  
   supplemental O<sub>2</sub> for rescuers doing CPR chest compressions—918, E1(Dec)  
 Emotion, affective cognition and human performance in space—532  
 Emotional conflict control, neural underpinnings of in pilots—798  
 Endometriosis, considerations for long-duration spaceflight—543  
 Endurance training, effect on performance in hypobaric hypoxia—776  
 Energy drinks, consumption by U.S. Army personnel—641

Ergonomics, of aircraft seats and passenger comfort—416  
 Errata—456, 684  
 Ethics, artificial intelligence in space health care—537  
 European Union, aircrew fatigue in—628  
 Eustachian tube dysfunction, facial baroparesis during airplane travel—679  
 Evacuation, medical risk quantification on International Space Station—332  
 Executive function, measuring transient impairments during acute hypoxia—839  
 Exercise  
   acute pulmonary edema in healthy subjects—662  
   excessive, rhabdomyolysis due to—901  
 Expedition-APPP, autonomous psychological support for isolation—876, E2(Nov)  
 Exploration spaceflight—*See* Long-duration space missions and Mars missions  
 Extracorporeal oxygenation therapy, for high-altitude decompression sickness—106  
 Extravehicular mobility unit, partial pressure of inspired CO<sub>2</sub> exposure levels in—923, E2(Dec)  
 Extreme environments  
   in acute pulmonary edema in healthy subjects—662  
   serious altitude illness cases at the South Pole—46  
 Eye movements  
   cognitive load and pilots' visual search strategies—489  
   during instrument landing system approach—511  
   vestibulo-ocular responses in aerobatic pilots—326

## F

Facial baroparesis, reversible peripheral nerve palsy during airplane travel—679  
 Fat free mass, predicting peak oxygen consumption—102  
 Fatalities  
   G-LOC due to push-pull effect in F-16 mishap—41  
   medical risk quantification on International Space Station—332  
 Fatigue  
   of aircrew in the EU—628  
   aircrew perceptions and circadian typology—363  
   aviation mishaps related to—440  
   caffeine and energy drink use by military aviators—641  
   management intervention effects on flight attendants—911  
   modafinil and aircraft carrier landing performance—518  
 Federal Aviation Administration (FAA)  
   Civil Aerospace Medical Institute—541  
   drug use reported by U.S. pilots to—586  
 Fertility, considerations for long-duration spaceflight—543  
 Fighter pilots—*See also* Military pilots  
   cervical EMG in air combat maneuvering—26  
   decompression sickness risk markers—11, 455 (Letter)  
   G-LOC due to push-pull effect in F-16—51  
   self-kinematic training for flight-associated neck pain—790  
   shifts in color vision with hypoxia—394  
   verbal reports and flight performance under spatial disorientation—948  
 Fitness, caffeine and energy drink use by military aviators—641  
 Fitness to fly—*See* Safety, aviation; Aeromedical disposition; and Waivers  
 Flight attendants, fatigue management intervention effects on—911  
 Flight duty periods, aircrew fatigue in the EU—628  
 Flight illusions, impact on precise approach in simulated flight—767  
 Flight safety—*See* Safety, aviation  
 Fremanezumab, for migraine prophylaxis in pilot—824  
 Functional imaging  
   fMRI and emotional conflict control in pilots—798  
   near-infrared spectroscopy—833

## G

- +G<sub>z</sub> forces
  - cervical EMG in air combat maneuvering—26
  - loss of consciousness due to push-pull effect—51
- Gas bubble formation, as marker for altitude decompression sickness—11, 455 (Letter)
- Gender differences
  - fat free mass predicts peak O<sub>2</sub> consumption—102
  - motion sickness in Chinese college students—71
  - on NASA's Cognition Test Battery—18, E1(Jan)
- General aviation
  - accident rates, causes, and injuries in—387
  - interpretability of weather information displays for—318
- Genetic predisposition, acute pulmonary edema in healthy subjects—662
- Genetic testing, of pilot applicants—535 (Letter)
- Glymphatic system, in optic disc edema in astronauts—975
- Ground-based medical services, for in-flight emergencies—348
- Gynecology, risk mitigation for long-duration spaceflight—543

## H

- Habituation, to airsickness after scopolamine treatment—313
- Hand-arm vibration syndrome—459
- Head movements, cervical EMG during air combat maneuvering—26
- Headaches
  - airplane, during flight—373
  - migraine in military pilot applicants—37
  - migraine prophylaxis in commercial pilot—824
- Health, relationship with the microbiome—651
- Health education, on fatigue management for flight attendants—911
- Health care
  - in space, bioprinting and biofabrication in—457
  - in space, role of artificial intelligence—537
- Hearing loss
  - faster delivery of custom earplugs to troops—749
  - fitness to fly with presbycusis—403
- Heart rate variability, verbal reports and pilot flight performance under spatial disorientation—940
- Helicopter emergency medical services (HEMS), transport times VFR and IFR vs. ground—98
- Helicopter pilots, rehabilitation of chronic flight-related neck pain—369
- Helicopter transport suit, for cold-water immersion—579
- Helicopter underwater egress breathing apparatus, effect on egress performance—962
- Helicopters
  - in diving accident evacuations—806
  - helicopter emergency breathing apparatus and emergency egress—962
  - performance of hoist operators—496, E2(June)
  - skin cooling and breath-hold duration in cold-water crashes—578
  - underwater escape training—962
- High-altitude cerebral edema (HACE), at the South Pole—46
- High-altitude decompression sickness (HADCS), hyperbaric therapy and extracorporeal oxygenation for—106
- High-altitude pulmonary edema (HAPE)
  - in healthy subjects—662
  - at the South Pole—46
- History
  - Focus on Aerospace Medicine History—462
  - life of Don Shields—56
  - Project Mercury—462
  - This Month in Aerospace Medicine History—62, 119, 382, 383, 465, 540, 615, 685, 751, 836, 908

- Hoist operation, helicopter, operator performance on simulator—496, E2(June)
- hs-CRP level, cardiovascular risk in pilots and air traffic controllers—886
- Human factors, aviator anthropometric screening for cockpit compatibility—725
- Human microbiome, aviation and—651
- Human performance—*See also* Cognitive performance
  - accident rates in general aviation—387
  - affective cognition approach in space—532
  - cognitive load effect on pilots' visual search strategies—489
  - modafinil and aircraft carrier landing performance—518
  - pilot workload assessment—932
  - prediction of using machine learning—479, E1(June)
  - psychophysiological responses of pilots in hypoxia training—785
  - respiratory muscle training and cycling at altitude—776
  - shooting ability in motion sickness simulation—703
  - skydiving with mild hypoxia—110
  - stress, cognition, drones, and adaptive tasks—376
  - verbal reports effect in spatial disorientation—948
- Human Systems Engineering Dept., of Naval Warfare Center Aircraft Division—837
- Hyperbaric oxygenation, for high-altitude decompression sickness—106
- Hypercalcemia, hyperparathyroidism in a loadmaster—59
- Hyperparathyroidism, in an Air Force loadmaster—59
- Hypobaria, cognitive impairment in acute normobaric hypoxia vs. hypobaric hypoxia—845
- Hypobaric decompression sickness, treatment using pressure suit—571
- Hypobaric hypoxia
  - endurance and resistance respiratory muscle training in—776
  - pure tone audiometry in—32
  - voice reactivity as marker for acute—471
- Hypothenar hammer syndrome—459
- Hypoxia
  - acute pulmonary edema in healthy subjects—662
  - audiometric changes under hypobaric—32
  - cognitive impairment in acute normobaric hypoxia vs. hypobaric hypoxia—845
  - color vision shifts with—394
  - measuring cognitive function impairment during acute—839
  - skydiving with—110
  - supplemental O<sub>2</sub> for rescuers doing CPR in commercial aircraft cabin—918, E1(Dec)
- Hypoxia training, pilots' psychophysiological responses—785

## I

- Imaging
  - fMRI and emotional conflict control in pilots—798
  - remotely guided ultrasound examinations—592
- Immersion
  - acute pulmonary edema in healthy subjects—662
  - dry, thigh cuff effects on venous flow—697
  - pulmonary edema in diving accidents with helicopter evacuation—806
- In-flight emergencies
  - ground-based medical services for—348
  - supplemental O<sub>2</sub> for rescuers doing CPR chest compressions—918, E1(Dec)
- Indomethacin, for airplane headache—373
- Infectious diseases
  - improving airline passenger and crew safety—611
  - tularemia in an aviator—379
- Information displays, weather, for general aviation—318
- Infrared thermometer guns, at airports—611

Inspired carbon dioxide, exposure levels in extravehicular mobility unit—923, E2(Dec)  
 Instrument flight rules (IFR), helicopter critical care transport times vs. VFR and ground—98  
 Integrated Medical Model, medical risk quantification on ISS—332  
 International Space Station  
   isokinetic force and work capacity after—422  
   medication dose tracker app for crew—41  
   quantification of medical risk on—332  
   rash and skin sensitivity after year-long mission—604  
 Intracranial pressure, glymphatic system in optic disc edema in astronauts—975  
 Intraocular injuries, lead foreign body after ejection from aircraft—674  
 Isokinetic dynamometry, muscle function and microgravity—422  
 Isolated and confined environments—*See also* Extreme environments *and* Spaceflight  
   autonomous psychological support for—876, E2(Nov)  
 Israeli Air Force, self-kinematic training for neck pain in pilots—790  
 Italian Air Force, total ankle replacement in military jet pilot—597

## J

Joint Helmet Mounted Cueing System, in air combat maneuvering—26

## K

Kidney stones, urinary calcium measures for tracking in space—689  
 Kinematic training, for neck pain in pilots—790  
 Kratom—978

## L

Launch, spacecraft, propellant off-gassing implications—956  
 Lead, intraocular foreign body injury after ejection—674  
 Lemon-squeezer's hand—459  
 Leukemia, from atmospheric nuclear tests—56  
 Lingual gyrus, emotional conflict control in pilots—798  
 Lipid hydroperoxides, survival training effects on—720  
 Logistics, faster delivery of custom earplugs to troops—749  
 Long-duration space missions  
   affective cognition and human performance on—532  
   gynecologic risk mitigation for—543  
   isokinetic force and work capacity after—422  
   postflight rash and skin sensitivity—604  
   vestibular and cardiovascular responses after—621  
   wearable ECG electrode placement model for—866  
 Long-haul flights, pilot awareness of venous thromboembolism on—343  
 Loss of consciousness, G<sub>z</sub>-induced, push-pull effect in fatal F-16 mishap—51  
 Loss of control, spatial disorientation in transport airplanes—65  
 Low back pain, in commercial airline pilots—940  
 Lower body compression garments, new dynamic countermeasure fabrics for—525

## M

Machine learning, predicting human performance using—479, E1(June)  
 Magnetic resonance imaging, functional, and emotional conflict control in pilots—798  
 Magnetic stimulation, transcranial, in aeromedical research—682  
 Mars Mental Health Model—737, E1(Sept)  
 Mars missions, mental health technology transfer between Earth and space—737, E1(Sept)  
 Masks, to prevent virus transmission among airline passengers—611

Medical certification—*See also* Aeromedical disposition  
   drug use reported by U.S. pilots—586  
   of pilots after cardiac transplantation—732  
 Medical evacuation, by helicopter in diving accidents—806  
 Medical risk, quantification tool on International Space Station—332  
 Medical school, creating an aerospace medicine curriculum—448  
 Medications  
   dose tracker app for astronauts—41  
   drug use reported by U.S. pilots—586  
   indomethacin for airplane headache—373  
   monoclonal antibody injections for migraine prophylaxis—824  
   scopolamine treatment and adaptation to airsickness—313  
   selective serotonin reuptake inhibitor use by Army aviators—897  
   systemic corticosteroids for URIs in aviators—453  
 Mental health  
   autonomous psychological support for isolation—876  
   selective serotonin reuptake inhibitor use by Army aviators—897  
   technology utilization both on Earth and in space—373, E1(Sept)  
 Mental stress, verbal reports effect on pilot performance in spatial disorientation—948  
 Microbiome, aviation and—651  
 Microgravity  
   affective cognition and human performance in—532  
   bioprinting and biofabrication in—457  
   docking and cognition test battery performance—861, E1(Nov)  
   dynamic posturography after long-duration spaceflight—621  
   muscle function after space missions—422  
   ocular “glymphatic” system in optic disc edema in astronauts—975  
   thigh cuffs reduce venous flow in dry immersion—697  
 Migraine  
   in military pilot applicants—37  
   prophylaxis in commercial pilot—824  
 Military aircrew  
   CT coronary angiography screening—812  
   body composition differences in—565  
   caffeine and energy drink use in—641  
   cross-cultural anthropometric analysis in—358  
   fatigue-related aviation mishaps—440  
   hyperparathyroidism in loadmaster—59  
   over-pressurization episodes in E-2D Hawkeye aircrew—970  
 Military personnel  
   musculoskeletal injuries and automation at aerial ports—669  
   survival training effects on oxidative stress—720  
 Military pilots—*See also* Fighter pilots  
   anthropometric screening for cockpit compatibility—725  
   Asian, simulator sickness time course—892  
   body composition differences in—565  
   caffeine and energy drink use in—641
